

Welcome

Welcome to the **Alternatives Development Citizens Information Meeting** for the I-64 Hampton Roads Bridge Tunnel (HRBT) Environmental Impact Statement (EIS).

The goals of this meeting are:

- Present the study needs - Capacity and Roadway Deficiencies
- Present existing 2011 and future 2040 traffic projections and stresses on the Infrastructure
- Obtain your input on alternatives development to date
- Provide an opportunity to gain your input

Background and Study Intent

- VDOT completed the Hampton Roads Bridge Tunnel Expansion Feasibility Study in 2008. The study examined several build alternatives for the HRBT Corridor.
- The current EIS study is a required step for Federal approval before design activities could proceed.
- With your assistance, VDOT developed the study Purpose and Need which identified capacity enhancements and roadway deficiencies as the primary needs to be addressed.
